Research Update:

City of Windsor 'AA' Ratings Affirmed On Low Debt Burden And Exceptional Liquidity; Outlook Stable

Overview

- We are affirming our 'AA' long-term issuer credit and senior unsecured debt ratings on the City of Windsor.
- The ratings reflect our assessment of the city's low debt burden, exceptional liquidity, strong budgetary performance, and strong financial management.
- The stable outlook reflects our expectations that, in the next two years, Windsor's tax-supported debt burden will continue to decline, liquidity will remain exceptional, and after-capital deficits will remain below 5% of adjusted total revenues, on average.

Rating Action

On Feb. 23, 2017, S&P Global Ratings affirmed its 'AA' long-term issuer credit and senior unsecured debt ratings on the City of Windsor, in the Province of Ontario. The outlook is stable.

Rationale

The ratings on Windsor reflect S&P Global Ratings' assessment of the city's strong financial management, exceptional liquidity position, and strong budgetary performance. The ratings also reflect our view of the very predictable and well-balanced institutional framework for Canadian municipalities, Windsor's low debt burden, and its low contingent liabilities. We believe that the city's economic profile that, although we consider it strong, has a relatively high industry concentration in the manufacturing sector; and limited budgetary flexibility somewhat mitigate these strengths.

We view Windsor's strong financial management practices as a credit strength. The city has prudent and long-term financial policies in place and a highly experienced management team to execute them. The city benefits from generally broad political consensus with a focus on financial sustainability. For the first time in nine years, Windsor's council passed a modest levy increase in the 2017 budget. We believe that continued commitment to tax increases to maintain and enhance service and infrastructure levels could also lead to improved flexibility. The city's very prudent policies governing debt use have allowed the management team to reduce the debt burden significantly in recent years and promoted efficiency and enhanced cash flow planning.

Windsor's debt burden is low and we expect it to decline further in the next two years. In our base-case forecast, we expect the tax-supported debt burden to represent 11% of consolidated operating revenues in 2019, less than half the burden in 2010. The city does not plan to issue debt in the next two years and will continue to focus on pay-as-you-go financing as a primary funding source for its capital plan. Interest costs are declining with amortizing debt, and we expect them to be below 1% of adjusted operating revenues in the outlook horizon. Windsor's postretirement obligations, which account for 70% of adjusted operating revenues, continue to constrain the city's overall debt profile, although Windsor has addressed these prospectively for all employee groups. Nevertheless, it will take some time for the liability to fall. The city's contingent liabilities are low and do not pose a significant risk to the credit profile, in our view.

We believe that Windsor's strong budgetary results are positive for the ratings as well. In line with our base-case forecast, we expect a slight revenue boost from projected property tax increases as operating pressures persist; and for operating balances to weaken and stabilize in the next two years, averaging about 6% in 2015-2019. We expect the city to maintain capital spending consistent with recent years and after-capital deficits to increase slightly, averaging 4.5% of total adjusted revenues.

We view Windsor's economic profile as strong, although still relatively heavily concentrated in the manufacturing sector. Based on income levels and higher value-added of the local industries, we estimate that the city's nominal GDP per capita would be slightly below that of Ontario but above US\$38,000. The labor market is showing encouraging results, as Windsor maintains its focus on job creation and skills matching, as well as ongoing initiatives, such as sports tourism, to diversify the economy.

We believe Canadian municipalities benefit from a very predictable and well-balanced local and regional government framework that has demonstrated a high degree of institutional stability. Although provincial governments mandate a significant proportion of municipal spending, they also impose fiscal restraint through legislative requirements to pass balanced operating budgets. Municipalities generally have the ability to match expenditures well with revenues, except for capital spending, which can be intensive. Any operating surpluses typically fund capital expenditures and future liabilities (such as postemployment obligations and landfill closure costs) through reserve contributions.

Windsor benefits from stable government funding while maintaining high modifiable revenues, at more than 80% of adjusted operating revenues. However, the city's eight-year levy freeze before growth, which ended in the most recent budget, suggests limited revenue-raising ability and negatively affects its weak budgetary flexibility, in our view. We believe Windsor is also constrained in its ability to cut expenditures, because of legislative requirements as well as its maintenance-heavy capital plan. Capital expenditures relative to total spending continue to decline, averaging about

13% in 2015-2019, which has weakened our assessment of the city's flexibility.

Liquidity

Windsor maintains an exceptional liquidity position, in our opinion. In our base-case scenario, we estimate free cash and liquid assets to average C\$291 million in 2017 and cover more than 25x the projected debt service for the year. We expect growing operating pressures and capital funding needs to place some stress on reserve levels in the medium term, but for debt service coverage to remain above well above 100% in the next two years. In line with that of domestic peers, the city has satisfactory access to external liquidity.

Outlook

The stable outlook reflects our expectations that, in the next two years, Windsor's tax-supported debt burden will continue to decline and that liquidity will remain exceptional. The outlook also reflects our expectation of strong budgetary performance, with after-capital deficits of less than 5% of adjusted total revenues.

We could take a positive rating action if budgetary flexibility were to strengthen materially through revenue enhancements, such as an increase in inflows of property tax revenues, fees, and other sources of revenue; and city administration continued its commitment to existing service levels and addresses its growing infrastructure needs, while maintaining focus on Windsor's long-term financial sustainability.

We could take a negative rating action if weaker economic performance and operating pressures resulted in sustained after-capital deficits of more than 5% of adjusted total revenues, on average; and operating and capital needs affected reserve levels and medium-term funding availability, negatively affecting the city's liquidity profile. However, we view this scenario as unlikely during the outlook horizon.
